

INSTRUCTION:

Required software:

- Visual Studio 2017/2019
- MS SQL Server
- GIT

To Download:

1. Install Git, Visual Studio and MS SQL Server.
2. Go to <https://github.com/Aljamil1113/ABC-123>
3. Open the git. Go to your preferred directory.
4. Then type 'git clone <https://github.com/Aljamil1113/ABC-123>'

```
MINGW64:/c/Users/Al Jamil/Desktop

Al Jamil@DESKTOP-KGQRUI1 MINGW64 ~
$ cd Desktop

Al Jamil@DESKTOP-KGQRUI1 MINGW64 ~/Desktop
$ git clone https://github.com/Aljamil1113/ABC-123

```

TO TEST ABC Client Portal

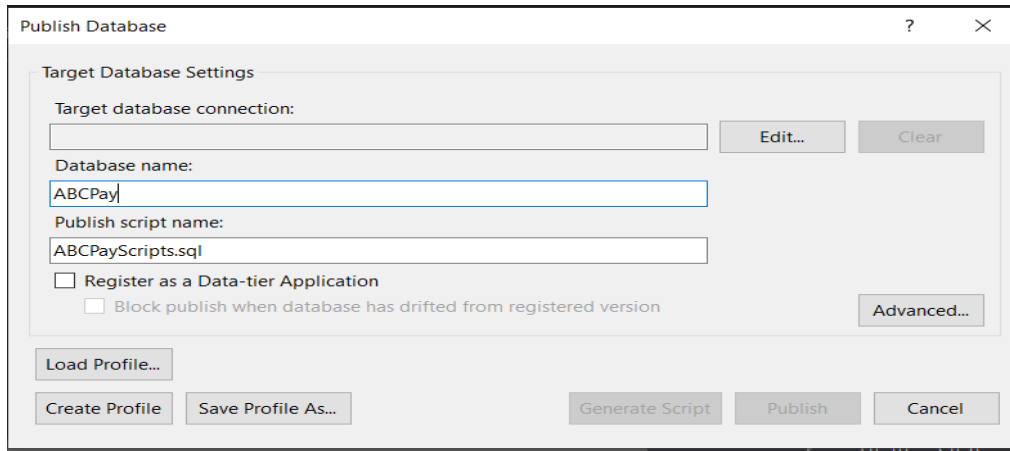

1. Open the ABC-123 folder then ABCPay folder. Then double click the ABCPay(Microsoft Visual Studio Solution) file.
2. You can see now the project files in Visual Studio. You can see two projects. The ABCPay MVC project and ABCPayScripts SQL Server Data Tools project.
3. Open the “appsettings.json” in ABCPay project then configure the ConnectionStrings. You just need to change the your server name in MS SQL Server.

4. Then Build the solution. Go to Menu then Build>Build Solution. Then Run the Application and stop the application. When do this, it create the ABCPay database.

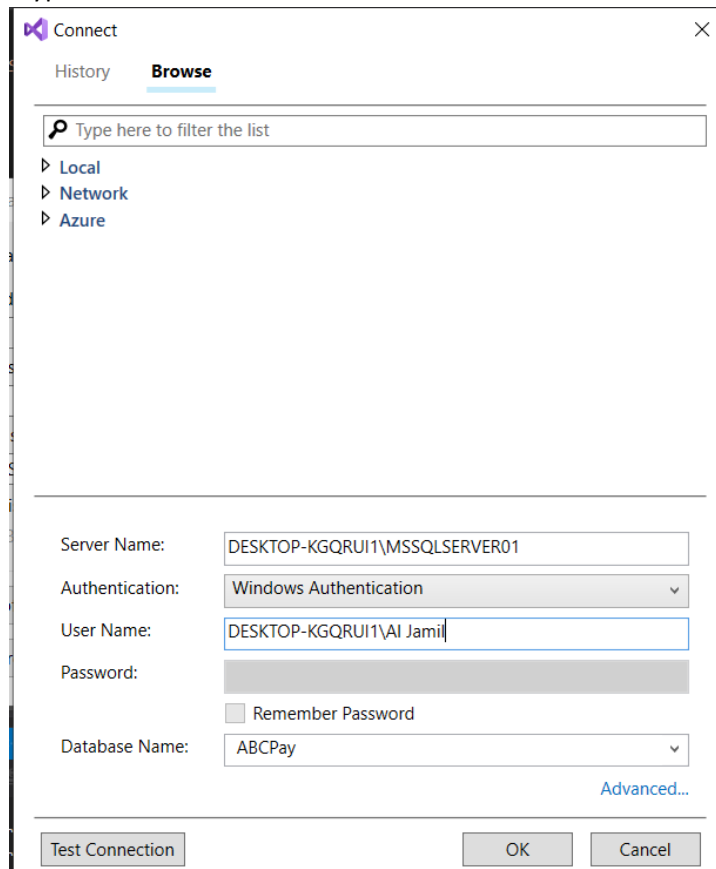

5. Go to ABCPayScripts Project. Click the ABCPayScripts project then Right Click then Choose Publish.
6. Type ABCPay to Database name.
7. Click the Edit button to select the database connection.

The 'Publish Database' dialog box is shown. It has a title bar with a question mark and a close button. The main section is titled 'Target Database Settings'. It contains a 'Target database connection:' label above a text box, with 'Edit...' and 'Clear' buttons to its right. Below this is the 'Database name:' label with a text box containing 'ABCPay'. The 'Publish script name:' label has a text box containing 'ABCPayScripts.sql'. There are two checkboxes: 'Register as a Data-tier Application' (unchecked) and 'Block publish when database has drifted from registered version' (unchecked). An 'Advanced...' button is to the right of these checkboxes. At the bottom, there are buttons for 'Load Profile...', 'Create Profile', 'Save Profile As...', 'Generate Script', 'Publish', and 'Cancel'.

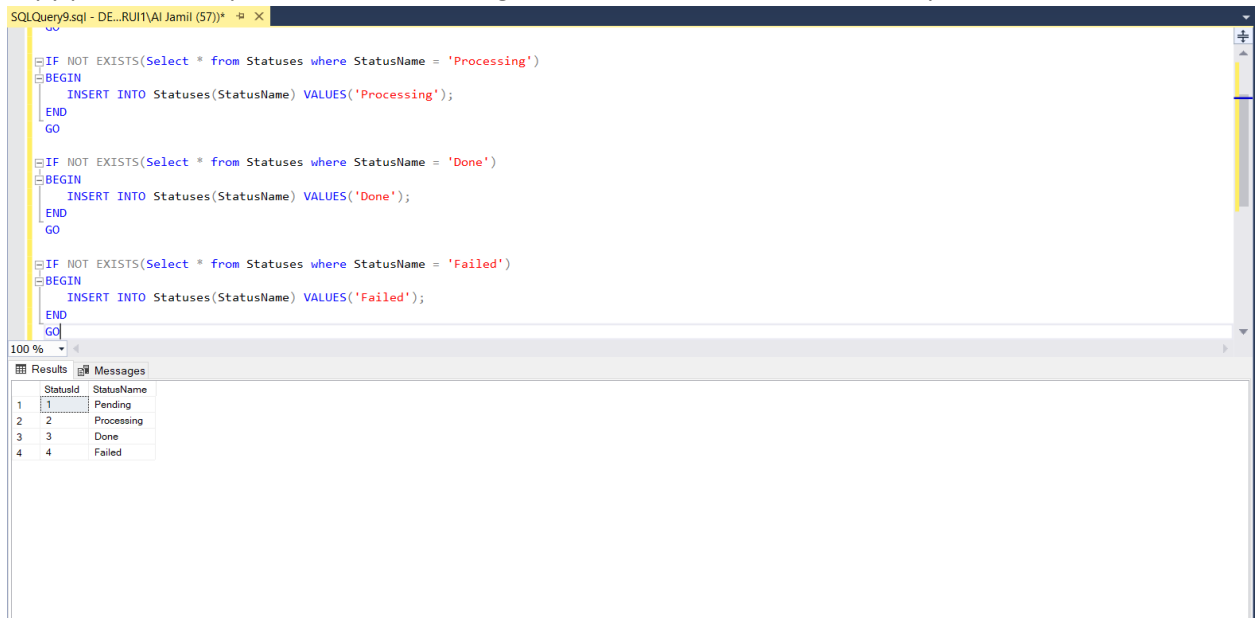

8. Go to Browse then type the Server Name and choose the Database name "ABCPay".

The 'Connect' dialog box is shown. It has a title bar with a purple icon and a close button. There are two tabs: 'History' and 'Browse', with 'Browse' selected. Below the tabs is a search bar with a magnifying glass icon and the text 'Type here to filter the list'. Under the search bar are three expandable categories: 'Local', 'Network', and 'Azure'. Below these is a section for connection details. It includes a 'Server Name:' label with a text box containing 'DESKTOP-KGQRUI1\MSSQLSERVER01'. The 'Authentication:' label has a dropdown menu showing 'Windows Authentication'. The 'User Name:' label has a text box containing 'DESKTOP-KGQRUI1\Al Jamil'. The 'Password:' label has a text box. Below the password box is a 'Remember Password' checkbox. The 'Database Name:' label has a dropdown menu showing 'ABCPay'. An 'Advanced...' link is to the right of the database name dropdown. At the bottom, there are buttons for 'Test Connection', 'OK', and 'Cancel'.

9. Then Click Ok. Then Click Publish. You need to do this to include the table view.

10. You need to seed data to Merchant and Status table. Go To ABCPayScripts>DML Folder. Then copy paste the script to SQL Server Management Studio then execute the scripts.

```
SQLQuery9.sql - DE...RUI1\AI Jamil (57)* X
IF NOT EXISTS(Select * from Statuses where StatusName = 'Processing')
BEGIN
    INSERT INTO Statuses(StatusName) VALUES('Processing');
END
GO

IF NOT EXISTS(Select * from Statuses where StatusName = 'Done')
BEGIN
    INSERT INTO Statuses(StatusName) VALUES('Done');
END
GO

IF NOT EXISTS(Select * from Statuses where StatusName = 'Failed')
BEGIN
    INSERT INTO Statuses(StatusName) VALUES('Failed');
END
GO
```

StatusId	StatusName
1	Pending
2	Processing
3	Done
4	Failed

11. Go back to Visual Studio then go to Build>Rebuild the projects.
12. You can now run the application. Click the Play Icon to run the application.
13. Go to Login. You can use any of two user.

Username: admin@abc.com

Password: Admin123*

Username: al@abc.com

Password: Admin123*

14. After Login, Go to Payment Request. Then you can upload one payment using “New Request Payment” or “Batch Request Payment”.
15. If you click “New Request Payment”, you just need to fill the form. Then Click save.

To Test Payment 123 Desktop Application

1. Add another desktop to run the Payment 123 app. To do this, I used the task view and Add another desktop. To change desktop, I press control + window key + left arrow key and press control + window key + right arrow key.

Just check this link: <https://www.windowscentral.com/how-use-task-view-windows-10>

2. I run the ABC Client Portal App to Desktop 1. The Payment 123 App to Desktop 2.

- Go to ABC-123 folder then open Pay123 folder. Then double click the Pay123(Microsoft Visual Studio Solution) file.
- You can see two projects. The Pay123 Winform project and Pay123SqlScripts SQL Server Data Tools project.
- Click the Pay123SqlScripts project first. Then Right Click then click Publish to perform database creation.
- Click Edit to set your server name. Go to Browse tab then fill the Server name then click ok. Then Type the database name. I type "Payment123". Then publish.

Publish Database

Target Database Settings

Target database connection:
 Data Source=DESKTOP-KGQRUI1\MSSQLSERVER01;Integrated Security=True Edit... Clear

Database name:
 Payment123

Publish script name:
 Pay123SqlScripts.sql

☐ Register as a Data-tier Application
☐ Block publish when database has drifted from registered version Advanced...

Load Profile...

Create Profile Save Profile As... Generate Script Publish Cancel

- To Seed the Data of Users, Merchant and Status table, Open the DML folder in Pay123SqlScripts project. Then copy the scripts of MerchantDML.sql, StatusDML.sql and UserDML.sql.
- Open the Microsoft SQL Server Management Tools then, choose the Payment123 database. Add new query. Paste here the scripts to seed the data needed.

SQL Query Editor - DESKTOP-KGQRUI1 (66)

```

/***** Script for SelectTopRows command from SMS *****/
IF NOT EXISTS(Select * from Users where UserName = 'root' AND Password = 'root123*')
BEGIN
  INSERT INTO Users(UserName, Password) VALUES('root', 'root123*');
END
GO

IF NOT EXISTS(Select * from Users where UserName = 'admin' AND Password = 'Admin123*')
BEGIN
  INSERT INTO Users(UserName, Password) VALUES('admin', 'Admin123*');
END
GO
  
```

Messages

```

(1 row affected)
(1 row affected)
Completion time: 2021-03-01T21:02:13.074462+05:00
  
```

Query executed successfully.

9. After you seed the data, Go to Pay123 project. Open the App.Config then set your connection string.

```
<defaultConnectionFactory type="System.Data.Entity.Infrastructure.LocalDbConnectionFactory, EntityFramework">
  <parameters>
    <parameter value="mssqllocaldb" />
  </parameters>
</defaultConnectionFactory>
<providers>
  <provider invariantName="System.Data.SqlClient" type="System.Data.Entity.SqlServer.SqlProviderServices, EntityFramework.SqlServer" />
</providers>
</entityFramework>
<connectionStrings>
  <add name="Pay123Db" connectionString="data source=DESKTOP-KGQRUI1;initial catalog=Payment123;integrated security=True;MultipleActiveResultSets=True" />
  <add name="Model1" connectionString="data source=DESKTOP-KGQRUI1;initial catalog=Payment123;integrated security=True;MultipleActiveResultSets=True" />
</connectionStrings>
<runtime>
  <assemblyBinding xmlns="urn:schemas-microsoft-com:asm.v1">
    <dependentAssembly>
      <assemblyIdentity name="Newtonsoft.Json" publicKeyToken="30ad4fe6b2a6aeed" culture="neutral" />
      <bindingRedirect oldVersion="0.0.0.0-13.0.0.0" newVersion="13.0.0.0" />
    </dependentAssembly>
  </assemblyBinding>
</runtime>
</configuration>
```

10. Before to run the Pay123app. Right Click the packages.config then choose “Migrate packages.config to PackageReference”. Then click Ok.

11. Then run the Pay123 app. To Login, you can use

Username: admin

Password: Admin123*

Or

Username: root

Password: root123*

12. After login. Go to menu the click “Process Payments” to update the transactions. Choose one record the click “Show Details” button to edit the details.
